

AWS Basic Set (for micro and free instances)
COSC 480 - Intro to GPU Programming
Fall 2015

The very first thing that you will need to do is to set up an AWS account. This is fairly straight-forward if you already have an amazon account.

Step 1: Follow the instructions at

<http://docs.aws.amazon.com/AWSEC2/latest/UserGuide/get-set-up-for-amazon-ec2.html>

Next, you'll set up and launch your instance. If you are on Windows, we suggest PuTTY

<http://www.chiark.greenend.org.uk/~sgtatham/putty/>

and on Mac/Linux, you'll be using your terminal client.

Step 2: Follow the instructions for steps 1, 2, and 4 here:

http://docs.aws.amazon.com/AWSEC2/latest/UserGuide/EC2_GetStarted.html

You want Ubuntu Server 14.04 LTS, on t2.micro.
