

# COSC 480 – Lab #1

Purpose: Work with AWS and S3 to build out a javascript enhanced website.

Task: Utilizing a bootstrap template or other javascript front-end language (like React or Angular), develop and deploy a single-page portfolio/CV website. The website must be delivered via S3 and AWS. The website should feature the following:

- A link to your resume.
- A profile picture (of your choice, it doesn't actually have to be you)
- An “about me” blurb

Deliverable: the link for the S3 bucket, via email

Maximum points: 10

Deductions:

- 2 No javascript
- 2 Missing component (per each)
- 4 not using AWS/S3
- 3 incorrect access settings preventing public access

Due: By 11:59 pm Monday. Link submission via email.
