COSC 251 – Lab #5

HTML - Huge Turkeys Melt Lemons

Purpose: Practice HTML

Task: The SMCM Furniture Store is a new company based in Schaefer Hall. It was started by the computer science department, and the company specializes in blue and yellow furniture. They hoped that their blue and yellow furniture would sell itself, but have had trouble getting customers. They have decided that going online is the best way for them to reach more customers and they need you to build them a website.
.
    Your site should have a main page with the SMCM logo in the top left, a menu bar along the left side of the page, and a main section for the page. The menu bar should have a block for each furniture item(These do not need to be clickable. You only need to build the frontend piece). The main section of the page should contain the company name across the top, the main image containing all 4 furniture options, and a short bio for the company below the image.

    When a furniture piece in the main image is clicked on, it should take the customer to a new page about the selected furniture (hint: use map tags). Each of these pages should have an image of the furniture, a description of the item, a price, and a buy button (This buy button does not need to work, it should just appear on the page)

All images have been provided

Deliverable: the 8 .html files needed for your webpage (The main page, the 3 files for the frames in the main page, and the 4 pages for each furniture option)

Deductions:
- -1 for cluttered pages
- -1 for no logo
- -2 for missing menu bar
- -2 for each page that does not appear
- -2 for lack of comments

Due: By 11:59 pm Tuesday. No exceptions. To be turned in via Blackboard.
